## Camera Follow Focus X1

---

MF-FF-X1

INSTRUCTION MANUAL

**IN THE BOX**

Please inspect the contents of your shipped package to ensure you have received all that is pictured and listed below.

**KIT INCLUDES**

- X1 Follow Focus
- 6pc Gear Ring Set
- Speed Crank
- This Manual

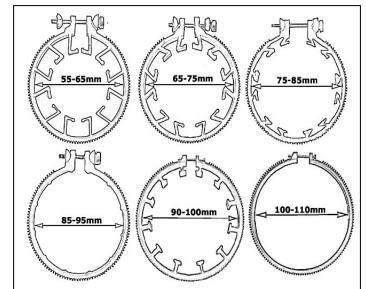

**X1 Follow Focus** is extremely accurate by design. The mechanism works through a set of gears in the follow focus that are attached to teeth on the focus ring of the lens. These gears feed to the control wheel that spin the teeth engaging the ring on the lens. Using the white marking disk with focus points indicated, allows the focus puller to hit his focus points with complete accuracy, each and every time.

**FOLLOW FOCUS COMPONENTS**

The Follow Focus is applied to the rail system and camera with the help of gears. The X1 comes with a set of **6 LENS GEAR ADAPTORS** ranging in size from 55-110 mm diameter to fit almost every lens. Attach the matching sized gear ring to the focus ring of your lens and fit the follow focus drive gear to the gear ring.

**SPEED CRANK** - when inserted in the MOVOFILMS Follow Focus standard accessory port, it provides remote operation of the focus control. It can also be used with a number of other Follow Focus units.

**ASSEMBLING OF X1 FOLLOW FOCUS**

- Match one gear ring from the provided gear set as per your cameras outer focusing ring diameter and mount it over your lens focusing ring. Tighten the gear properly with provided screw & cap.

- Insert the X1 follow focus on 15mm rods by loosening the side knobs, after mounting tighten the side knobs to secure properly.
- Adjust the Follow Focus lightly to make contact with the gear ring attached to the Camera.

**Note:** You can use Crank for better focusing results.

**YOUR X1 FOLLOW FOCUS IS READY TO GO.**
